# EXCELLENT DRILLING PROGRAM RESULTS TO DATE

Initial results from 2023 drilling at EPO indicate potential to upgrade/expand resources

## Resource categorization drilling

- Currently 671 koz AuEq Indicated, 732 koz AuEq Inferred
- Infill drilling along the southern portion of the deposit returned intercepts with similar grades and widths as previous drilling
- Expect to upgrade a portion of Inferred resources in this area to the Indicated category
- Results to form basis for economic assessment of EPO planned for 2024

## Resource expansion drilling

- Confirmed continuity of mineralization 500 m north of EPO
- Higher copper mineralization relative to gold noted in the four drill holes completed to date
- Drilling in H2 is focused on extending mineralization to the north and south of the deposit

1) Please refer to Safe Harbor Statement on slide 2.  
 2) All references to Mineral Reserves and Resources are gold equivalent unless otherwise stated; see slide 28 for a breakdown of year-end 2022 Mineral Reserves by deposit and category including tonnes, grade and contained metal for gold, silver, copper and gold equivalent as well as slide 29 for notes to accompany Mineral Reserve estimates. ## FINANCIAL PERFORMANCE

**ANDREW SNOWDEN**  
CFO

# FINANCIAL PERFORMANCE

Increased production and higher margins to drive strong financial close to 2023

## All-in sustaining margins expected to improve in Q4

## EBITDA set to rebound in Q4 with strong production

## Media Luna capex anticipated to increase further in Q4

## Quarterly free cash flow set to turn positive in 2025

1) For more information on operational and financial results, including information on non-GAAP measures (such as TCC, AISC, capital expenditures, average realized price, AISC margin, adjusted EBITDA, and free cash flow), please refer to Torex Gold's latest MD&A filed on SEDAR ([www.sedar.com](http://www.sedar.com)) or on the Company's website ([www.torexgold.com](http://www.torexgold.com)). See also Key Financial Metrics on slide 25 for the comparable GAAP financial measure.

# UNIT COST PERFORMANCE<sup>1</sup>

## Solid cost performance despite ongoing inflationary pressures<sup>2</sup>

- Open pit mining costs tracking higher than budget given additional stockpile rehandling and contractor costs associated with period of higher waste stripping during Q2 and Q3
- Economies of scale from higher underground mining rates continue to mitigate cost pressures
- Processing costs reflect higher reagent and other consumable prices relative to levels paid in 2022
- Site support costs tracking slightly higher than 2022 primarily given strength in the Mexican peso year-to-date
- 2023 Mexican Profit Sharing (“PTU”) lower year-to-date, primarily related to lower margins given period of elevated waste stripping during Q2 and Q3

1) For more information on operational and financial results, including information on non-GAAP measures (such as unit cost), please refer to Torex Gold’s latest MD&A filed on SEDAR ([www.sedar.com](http://www.sedar.com)) or on the Company’s website ([www.torexgold.com](http://www.torexgold.com)). See also Key Financial Metrics on slide 25 for the comparable GAAP financial measure.

2) Year-to-date costs through Q3 2023.

3) Mining costs do not include the capitalization of waste stripping and changes in inventory.

# CASH FLOW GENERATION

Free cash flow during Q3 2023 reflects increasing Media Luna Project spend

# NOTES TO MINERAL RESERVES

## Morelos Complex

### Notes to accompany Mineral Reserve Table

1. Mineral Reserves were developed in accordance with CIM (2014) guidelines.
2. Rounding may result in apparent summation differences between tonnes, grade, and contained metal content. Surface Stockpile Mineral Reserves are estimated using production and survey data and apply the same gold equivalent (“AuEq”) formula as ELG Open Pits.
3. AuEq of Total Reserves is established from combined contributions of the various deposits.
4. The qualified person for the Mineral Reserve estimate is Johannes (Gertjan) Bekkers, P. Eng., VP of Mines Technical Services.
5. The qualified person is not aware of mining, metallurgical, infrastructure, permitting, or other factors that materially affect the Mineral Reserve estimates.
