# Corporate Responsibility: Safety

## ***Construction completed without an LTI for MML...***

End 2015	Lost Time Incidents				LTIFR	Hours in last 12 months
	1 month	3 months	6 months	12 months		
MML	0	0	0	0	-	1,230,920
MML Contractors	0	0	0	0	-	599,838
M3	0	0	4	7	0.92	7,611,284
<b>Total</b>	<b>0</b>	<b>0</b>	<b>4</b>	<b>7</b>	<b>0.74</b>	<b>9,442,042</b>

- ✓ MML: 1.9M hours worked without a lost time injury (LTI) over 26 months
- ✓ Up to 3500 people working at the site – mostly contractors with >16M hours worked total
- ✓ 9.2M hours in last 12 months with a total of 7 LTIs
- ✓ 2015 Lost time injury frequency index 0.74 per million hours worked – better than peers

***...the change to operations brings different challenges***

# Corporate Responsibility: Health

## *Health management now centralized at the mine...*

- ✓ MML doctor and team oversee MML and contractor health
- ✓ Assistance to communities for emergencies (MML assists directly with paramedics and a doctor in Nuevo Balsas)
- ✓ Move to risk-based health management for MML team – higher risk, greater level of surveillance

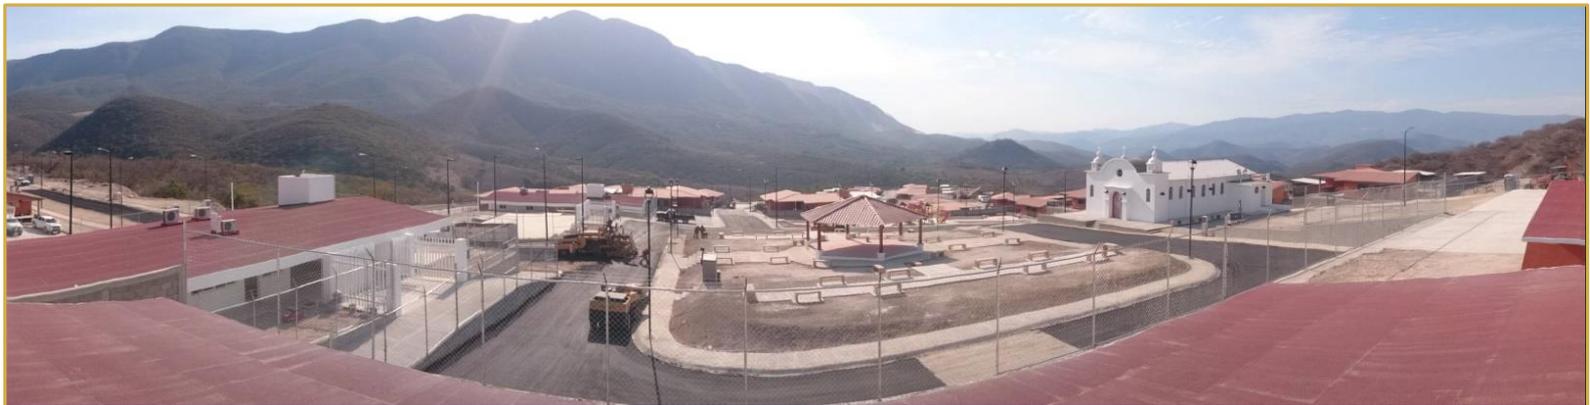

*...community assistance continues*

# Corporate Responsibility: Resettlement

## ***Resettlement of the essential community completed...***

- ✓ Resettlement of La Fundición essential for the mining (dump development) – completed in Q4 2015
- ✓ Resettlement of Real del Limón should be completed in Q2, 2016 – village 98% complete
- ✓ La Fundición community members are personalizing their homes

***...and the second one just about to happen***

# Corporate Responsibility: Community

## *How to help communities...*

- ✓ Formalized, transparent grievance management system implemented
- ✓ Community systems being developed with long-term view (requests for assistance)
- ✓ Economic development initiatives build on existing skills and are not associated with the mine:
  - ✓ Fish production
  - ✓ Agriculture

***...without replacing the government***

## ***Baseline data completed...***

- ✓ Initial monitoring network extensive – now focussed on operational control
- ✓ Implementation of plans to address permit requirements (flora rescue)
- ✓ Reports submitted to regulators as required by permits
- ✓ No water discharge from site to date
- ✓ 3<sup>rd</sup> party asset retirement obligation estimate completed
- ✓ No citations or reports from the regulatory authority

***...monitoring network in place***

## ***Project design provides innovation...***

- ✓ Use of the RopeCon reduces the production of GHG and dust
- ✓ Tailings dry stack:
  - ✓ Efficient water management
  - ✓ Reduced cyanide management needs
  - ✓ Long-term stable
  - ✓ Initial monitoring network extensive – now focussed on operational control
- ✓ On-site water management maximizes re-use of water saving cost and local resources

***...to reduce long-term environmental management***
