Photographic Report

Overview Of The Project Site

Process Plant (First Roof Truss Installed On The Mill Building)

Mill Building (Control Room Being Built On The Right)

Crusher & Stacking Conveyor (For The Fine Ore Stockpile)

Water Management: (Building The 'Dams' For The Water Control Ponds)

Guajes Primary Crusher (The Retaining Wall Is Almost Finished)

Guajes Primary Crusher (Aligning The Motor To The Crusher)

Rope-Con Anchor Point (Formwork Installation For The Final Pour)

Reclaim Tunnel (The Conveyor That Will Feed Ore From The Stockpile To The SAG Mill)

Reclaim Tunnel (Installing The Conveyor Feeders)

Pre-Leaching (Fabrication Of The 30 Metre Diameter Thickener)

Leaching (Compressors Are Mounted, Erecting The Structural Steel Around Them)

Leaching (Pipe Rack And 11 Leach Tanks In Various Stages Of Construction)

Leaching (Welding / Fabricating The Leach Tanks)

CIP/CIC Area (Installation Of Prefabricated Tanks and Equipment)

Carbon Handling (Installing Tanks And Mechanical Equipment)

Tailings Filter Building (Elevated Floor Slabs Are Being Poured And Mechanical Installations Have Started)

Cyanide Destruction (Thickener And Tanks Are Being Fabricated And Will Be Painted When Finished)

Dry Stack Tailings (Excavation for Footings To Support The Conveyor To The Tailings Disposal Area)

Water Tank (At The Well Field)

Main Substation (Wiring Of The Transformers and Installation Of Transmission Towers To The Grid)

Balsas Substation (The Facility That Connects To The Grid)

Reagent Building (Mounting Tanks And Erecting Structural Steel)

Truck Shop (Pouring The Concrete Floors And Starting The Erection Of Structural Steel)

Permanent Camp (Very Close To Being Finished)

Village Relocation (The 1st Village To Move Is In The Foreground The 2nd Is Getting Started At The Back)

El Limon (Getting Ready To Build The Crusher And Top End Of The Rope Conveyor)

Mining (Guajes E, B, And C Pits, Working Down The Three Ridges On The Face Of The Mountain)

Mining (Ore Stockpiles Are Growing Quickly)
